

Slant Back Roof Vent OPTI-TA100

These slant back static roof vents (for 4/12 slope and above) are an excellent shield against weather infiltration, especially on steep-slope roofs. Our unit has a distinct advantage as our base and collar is one-piece of material.

Advantages

Excellent protection against insect and rodent intrusion
The design prevents congestion caused by pine leaves or other debris that could accumulate on the roof and impact the exchange of air in the attic
The media filter prevents all types of weather-related infiltration

Colours

Standard colours available: brown, grey, black and charcoal. Other colours available on special order (additional fee).

Norms

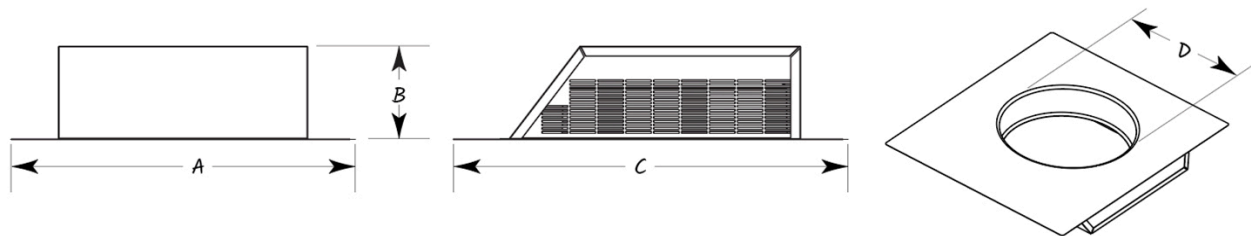

In compliance with CSA
The National Building Code requires adequate ventilation of the roof as per the minimum standard of Section 9.19.1 or according to the ACNOR CAN3-A93-M82.

Use

Ventilation is required by the Canadian Building Code. A good ventilation means keeping the attic space near the outside temperature to avoid excessive contrasts. With the help of soffits, for example In summer, the chimney effect created by the Optimum ventilator eliminates excess heat from the attic and thus helps maintain the integrity of the asphalt shingles. In winter, you will get a drier attic. No matter what the season, Optimum Ventilators will help to optimize the comfort of your home!

Characteristics

The vent is manufactured from galvanized steel followed by a specialized baked paint finish.

PRODUCT	DIMENSIONS				EVACUATION	STEEL GAUGE USED
